

USGBC Arizona Chapter—Sonoran Green Expo
Tucson AZ
October 23, 2010

Green Ingredients LLC (GI), Distributor for Magnum Building Products and their Magnum Board® Product Line, recently exhibit in the **“USGBC AZ Chapter Sonoran Green Expo”** held in Tucson, Arizona on October 23, 2010.

The reception by the attendees was very positive with considerable interest in Magnum Board® and the solutions it offers. While the show was open to the public most of the attendees were architects and engineers. They asked great questions and showed great interest in using MBP products in their future projects. The visual demonstration of putting Magnum Board® next to gypsum in water is hard to dispute and gets the point across that Magnum Board® is a far superior product to gypsum.

Magnum Board has a product for almost every application including interior wall and ceiling board, backer board and underlayment and a full line of trim products. For the exterior, wall board, soffit, fascia and trim as well as our recently introduced line of siding products.

Please visit our website at: www.magnumbp.com to view our testing, install guidelines and a gallery of installations worldwide.
