Ed Gilbert

Hello Ed:

I have chosen Magnum Board for our wall system for a number of reasons, which I will list below.

#1 Magnum Board has a better finish than other products tested to be incorporated in our wall system.

#2 While testing a competitor's product, "Dragon Board" for heat transfer I found it gave off a noxious gas so strong, I had to open the overhead door to my test lab to allow the fumes to escape. I then tested Magnum Board and found it didn't off gas like the other product.

#3 While doing the high temp test the other product cracked into three pieces which failed the test.

I will be looking forward to doing business with you in the future.

Respectfully Yours:

Pastor Andy Miller

Owner
