## Fiber Reinforced MgO Cement Sheathing & Siding Building Materials

Sheathing

MAGNUM 1-11

Exterior Horizontal Lap Siding

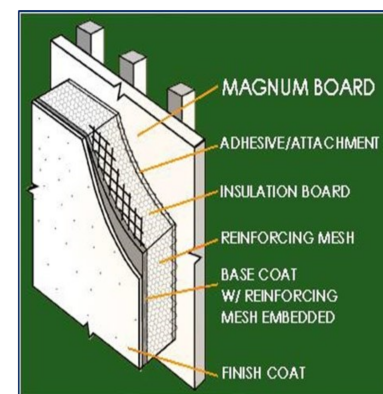

Magnum Flooring

Tape Relief Edge Profile

Structural Insulated Panels

SIP Fencing System

Exterior Insulated Finish System-(EIFS)

## THE NEW GENERATION “GREEN” BUILDING MATERIAL INSTALL IT FOR HEALTH—INSTALL IT FOR LIFE!

### OUR COMPANY

Magnum Board Products, LLC-(MBP) is a privately held company started in 2004 for the express purpose of developing new building material technologies, manufacturing those products, and working thru reputable Dealers, offer those products to the World. The goal of MBP was and continues to be to provide **GREEN** materials that will:

1. Improve the safety of our homes and places of work;
2. Increase the life and value of the consumers' investment;
3. Have a positive impact on the environment in which we live; and
4. Reshape the building and construction industrie for the betterment of mankind

We believe our dedication to honesty & integrity, in all we do, has and will continue to provide the path for MBP to be the most trusted name in the building material industry.

### MAGNUM BOARD®

What differentiates Magnum Board®-(MB) brand fiber reinforced MgO cement board from traditional building materials and other MgO products / manufacturers and suppliers?

MB is unique in that it is virtually impervious to fire, water and insects; does not feed mold or mildew; and, is nontoxic. MB is manufactured at ambient temperatures and the process is ECO friendly. Absolute minimal power is used in the manufacturing process. MB is one of the “**GREENEST**” and most user friendly building and construction materials available in the industry today. **And, Magnum Board® is C02 Negative!**

Because of its unique qualities, the total installed costs of MB is extremely competitive; and, the life cycle costs are generally always lower when compared to using traditional building materials used in the market today.

On Behalf of  
Mother - Nature

**THANK YOU**  
**“TIME TO GO GREEN”**

### TESTING & ACCREDITATION

MB has been tested to the very stringent United States International Code Council Requirements set forth in ICC-AC308 acceptance criteria using ASTM test protocol and is UL approved in both the US and Canada. MB is non combustible, non flammable and has a zero smoke developed and zero flame rating. MB is the only fiber reinforced MgO cement board product in the world to receive an ESR from the ICC-ES Code Council of the United States and be listed by UL in the USA & Canada. MB is also certified in Canada to the CCMC criteria and we recently completed the necessary CE Certification (European Building Material Code) fire requirements and MBP continues to test to fully complete the CE by early 2019. In accordance with the APLAC Mutual Recognition Arrangement Program-(MRA), MB testing and certifications are recognized by most Countries around the World. Our factory is ISO certified and is continually audited by both the ICC and UL to help ensure continued excellent quality for all MB goods.

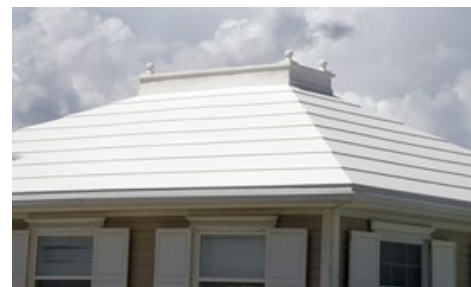

## PRODUCT BENEFITS

Magnum Board® has been tested far beyond the requirements of ICC, UL, CCMC and CE to help assure the public of the benefits of MB. Magnum Board® include, but are not limited to the following:

- ◆ Impervious to fire, water and insects including termites and carpenter ants. NOTE: Like most building materials, MB may absorb moisture, but leaches that moisture rapidly with no dimensional or structural affect on MB.
- ◆ Non-flammable
- ◆ Non-combustible
- ◆ Zero smoke developed
- ◆ Zero flame spread
- ◆ Non-toxic
- ◆ Smooth Level 5 finish
- ◆ High structural strength

All Magnum Board® products are made with one formula for both interior and exterior applications and provides for fire rated dry construction; quick erection and finishing; is a high impact product that fits most every application.

## APPLICATIONS

Magnum Board® is an extremely versatile product. It has and continues to be used around the World in many project types and applications such as:

- Single and multi family dwellings
- Office buildings
- Restaurants
- Schools
- Hotels
- Airports
- Retail complexes
- Many more

Magnum Board® product line includes:

- ◆ Interior & Exterior Walls
- ◆ Backer Board and Underlayment
- ◆ Roofing and Flooring Substrate
- ◆ Magnum Vertical Wood Grain Siding
- ◆ Exterior horizontal lap siding
- ◆ Shear walls
- ◆ Fire Walls
- ◆ Skins for Structural Insulated Panels
- ◆ Skins for Drop Ceilings and much more.

## PARTNERED SERVICES

### DISTRIBUTORS AND OEM'S

MBP continues to work hard to ensure Magnum Board® is available as close to their point of use as possible. To that end we continue to seek reputable Dealers and OEM's who's mission is similar to that of MBP: Improve the safety of our homes and places of work; Increase the life and value of the consumers' investment; Have a positive impact on the environment in which we live; and Reshape the building and construction industry for the betterment of mankind
